

## TABLE OF CONTENTS

EXECUTIVE SUMMARY .....	I
Purpose .....	i
Monitoring and Analysis.....	i
Summary of Findings.....	iv
Findings Report .....	v
Analysis and Discussion .....	vii
INTRODUCTION .....	1
METHODS .....	3
Baseflow Sampling .....	3
Storm Water Sampling.....	8
State and Federal Water Quality Criteria .....	8
Washington State Department of Ecology - Water Quality Criteria .....	8
Criteria for Trace Metals in Storm Water .....	8
Apparent Effects Thresholds for Trace Metals in Sediments.....	9
Statistical Methods.....	9
Discussion Format .....	11
RESULTS AND DISCUSSION .....	13
Conventional Parameters .....	13
Flow .....	13
Dissolved Oxygen.....	14
Temperature .....	17
Turbidity and Total Suspended Solids .....	19
pH .....	24
Conductivity.....	26
Nutrients .....	29
Nitrogen (Ammonia, Nitrate+Nitrite, Total Nitrogen).....	29
Phosphorus (Ortho-Phosphorus, Total Phosphorus) .....	36
Bacteria (Fecal Coliform, Enterococcus).....	39
Criteria .....	39
Storm/Wet Season Comparison to Baseline .....	57
Trace Metals .....	58
Analytical Methods Used for Trace Metals .....	59
Hardness, Alkalinity and Metal Toxicity .....	61
Comparisons to Washington Criteria (WAC 173-201A).....	62
Comparison of the filtered/unfiltered fractions.....	64
Sediment Metal Concentrations .....	65
SUMMARY OF FINDINGS .....	67
Summary of Findings.....	68
Findings Report .....	69
Analysis and Discussion .....	70
RECOMMENDATIONS AND CONCLUSION.....	74
List of Recommendations .....	74
Conclusion .....	74
REFERENCE LIST .....	76

## APPENDICES

- I. Laboratory analytical methods
- II. Summaries of Baseline Water Quality Data
- III. Summaries of Storm Water Quality Data
- IV. Time-Series Plots of Various Water Quality Parameters
- V. Summaries of bacteria counts and stream flows

## LIST OF TABLES

Table ES-1. Sampling and Gauge Locations, Drainage Area (square miles), and Number of Sample Events .....	iii
Table ES-2. Number of stream measurements for selected parameters between 1976 and 1999.....	iv
Table 1. Sampling and Gauge Locations, Drainage Area (square miles), and Number of Sample Events .....	4
Table 2. Number of stream measurements for selected parameters between 1976 and 1999.....	5
Table 3. Summary of Dissolved Oxygen Concentrations in Baseline and Storm Measurements.....	15
Table 4. Summary of Temperature Values in Baseline and Storm Measurements.....	17
Table 5. Summary of Turbidity Values in Baseline and Storm Measurements .....	20
Table 6. Summary of Total Suspended Solid Concentrations in Baseline and Storm Measurements .....	23
Table 7. Summary of pH values in Baseline and Storm Measurements .....	25
Table 8. Summary of Conductivity Values in Baseline and Storm Measurements .....	26
Table 9 Conductivity versus Alkalinity Comparison Statistics for Twelve Streams and Three River Sites .....	28
Table 10. Nitrogen forms and their relative percentages found in the baseline stream samples.....	30
Table 11. Ratio of $\text{NH}_4^+$ to $\text{NH}_4\text{OH}$ at different pH levels. ....	30
Table 13. Summary of Nitrate+Nitrite Concentrations in Baseline and Storm Measurements.....	34
Table 14. Summary of Total Nitrogen Concentrations in Baseline and Storm Measurements.....	35
Table 15. Summary of Total Phosphorus Concentrations in Baseline and Storm Measurements .....	37

Table 16. Summary of Ortho- Phosphorus Concentrations in Baseline and Storm Measurements ..... 39

Table 17. Summary of Bacteria Counts in Baseline and Storm Measurements..... 42

Table 18. Period of Record and Limits of Detection for Various Trace Metals and Analytical Methods. (mg/L)..... 60

Table 19. Summary of Trace Metals Yielded by Three Analytical Methods Compared to Criteria (numbers are percentages) ..... 63

Table 20. Number of Samples Analyzed by ICP-MS Meeting Metal Criteria for Surface Waters..... 64

Table 21. Summary of Levels Found in Unfiltered (Total) versus Filtered (Dissolved) Stormwater Samples Collected in 1998 and 1999<sup>1</sup>..... 65

Table 22. Average Metal Concentrations (mg/kg dry weight) in Stream Sediments (1987-1998) Compared to “Possible Sediment Quality Values” (WSDOE, 1997). ..... 66

**LIST OF FIGURES**

Figure 1a. North Lake Washington streams Water Quality Sample Sites ..... 6

Figure 1b. Soos Creek Water Quality Sample Sites..... 7

Figure 2. Example of a Time Series Plot. (Shaded area represents the “typical range.” Solid line represents the Moving Mean). ..... 10

Figure 3. Average Flows from Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek..... 14

Figure 4. Average Dissolved Oxygen Concentrations for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 16

Figure 5. Average Temperatures for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek..... 18

Figure 6. Average Turbidity for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 21

Figure 7. Average Total Suspended Solids for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek..... 23

Figure 8. Average pH for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 25

Figure 9. Average Conductivity for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek..... 27

Figure 10. Average Ammonia-nitrogen for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek..... 32

Figure 11. Average Total Nitrogen and Nitrate+nitrite for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 34

Figure 12. Average Total Phosphorus and ortho-Phosphorus for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 38

Figure 13. Geometric Means of Fecal Coliform Bacteria Counts for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 42

Figure 14. Geometric Means of Enterococcus Bacteria Counts for Baseline Wet and Dry Season Measurements (1979 – 1999), and Storm Event Measurements (1987 – 1999) at the mouth of each creek ..... 44

Figure 15a. Thornton Creek bacteria and flow ..... 47

Figure 15b. McAleer Creek bacteria and flow ..... 47

Figure 15c. Swamp Creek bacteria and flow ..... 48

Figure 15d. Lyon Creek bacteria and flow ..... 48

Figure 15e. North Creek bacteria and flow ..... 49

Figure 15f. Sammamish River bacteria and flow ..... 49

Figure 15g. Big Bear Creek bacteria and flow ..... 50

Figure 15h. Juanita Creek bacteria and flow ..... 50

Figure 15i. Soos Creek bacteria and flow ..... 51

Figure 16a. March 26, 2001: Fecal coliform bacteria concentrations measured in Thornton Creek ..... 53

Figure 16b. March 27, 2001: Fecal coliform bacteria concentrations measured in Thornton Creek ..... 54

Figure 16c. March 28, 2001: Fecal coliform bacteria concentrations measured in Thornton Creek ..... 55

Figure 16d. April 18, 2001: Fecal coliform bacteria concentrations measured in Thornton Creek ..... 56

Figure 17. Average storm concentrations for various parameters divided by baseline averages for the winter months ..... 59

Figure 18. Comparison of alkalinity with calcium + magnesium hardness. Slope of the regression = 1.11 ..... 62
