

**King County**

Department of Natural Resources and Parks  
Wastewater Treatment Division

## **Special Community Meeting: NEW Lincoln Park South Parking Lot proposal for Combined Sewer Overflow (CSO) control**

King County has been working with the community in West Seattle since 2007 to develop a plan to control combined sewer overflows in Puget Sound. The Murray Community Advisory Group, or CAG, has recommended a water storage tank under the Lincoln Park south parking lot. King County needs to hear from the community as part of the process to evaluate this alternative.

**What:** Public meeting to discuss the new alternative proposed by the Murray Community Advisory Group for CSO control in West Seattle.

**When:** Monday, November 1, 2010  
6:30-8:30 p.m.

**Where:** The Hall at Fauntleroy  
9131 California Ave S.W.  
Seattle, WA 98136

Lincoln Park south parking lot

### **For more information:**

To learn more about King County's proposals for CSO control in the Barton and Murray basins visit the project Web page at [www.kingcounty.gov/CSOBeachProjects](http://www.kingcounty.gov/CSOBeachProjects). You can also access the CAG's recommendation at this website.

### **What is a CSO?**

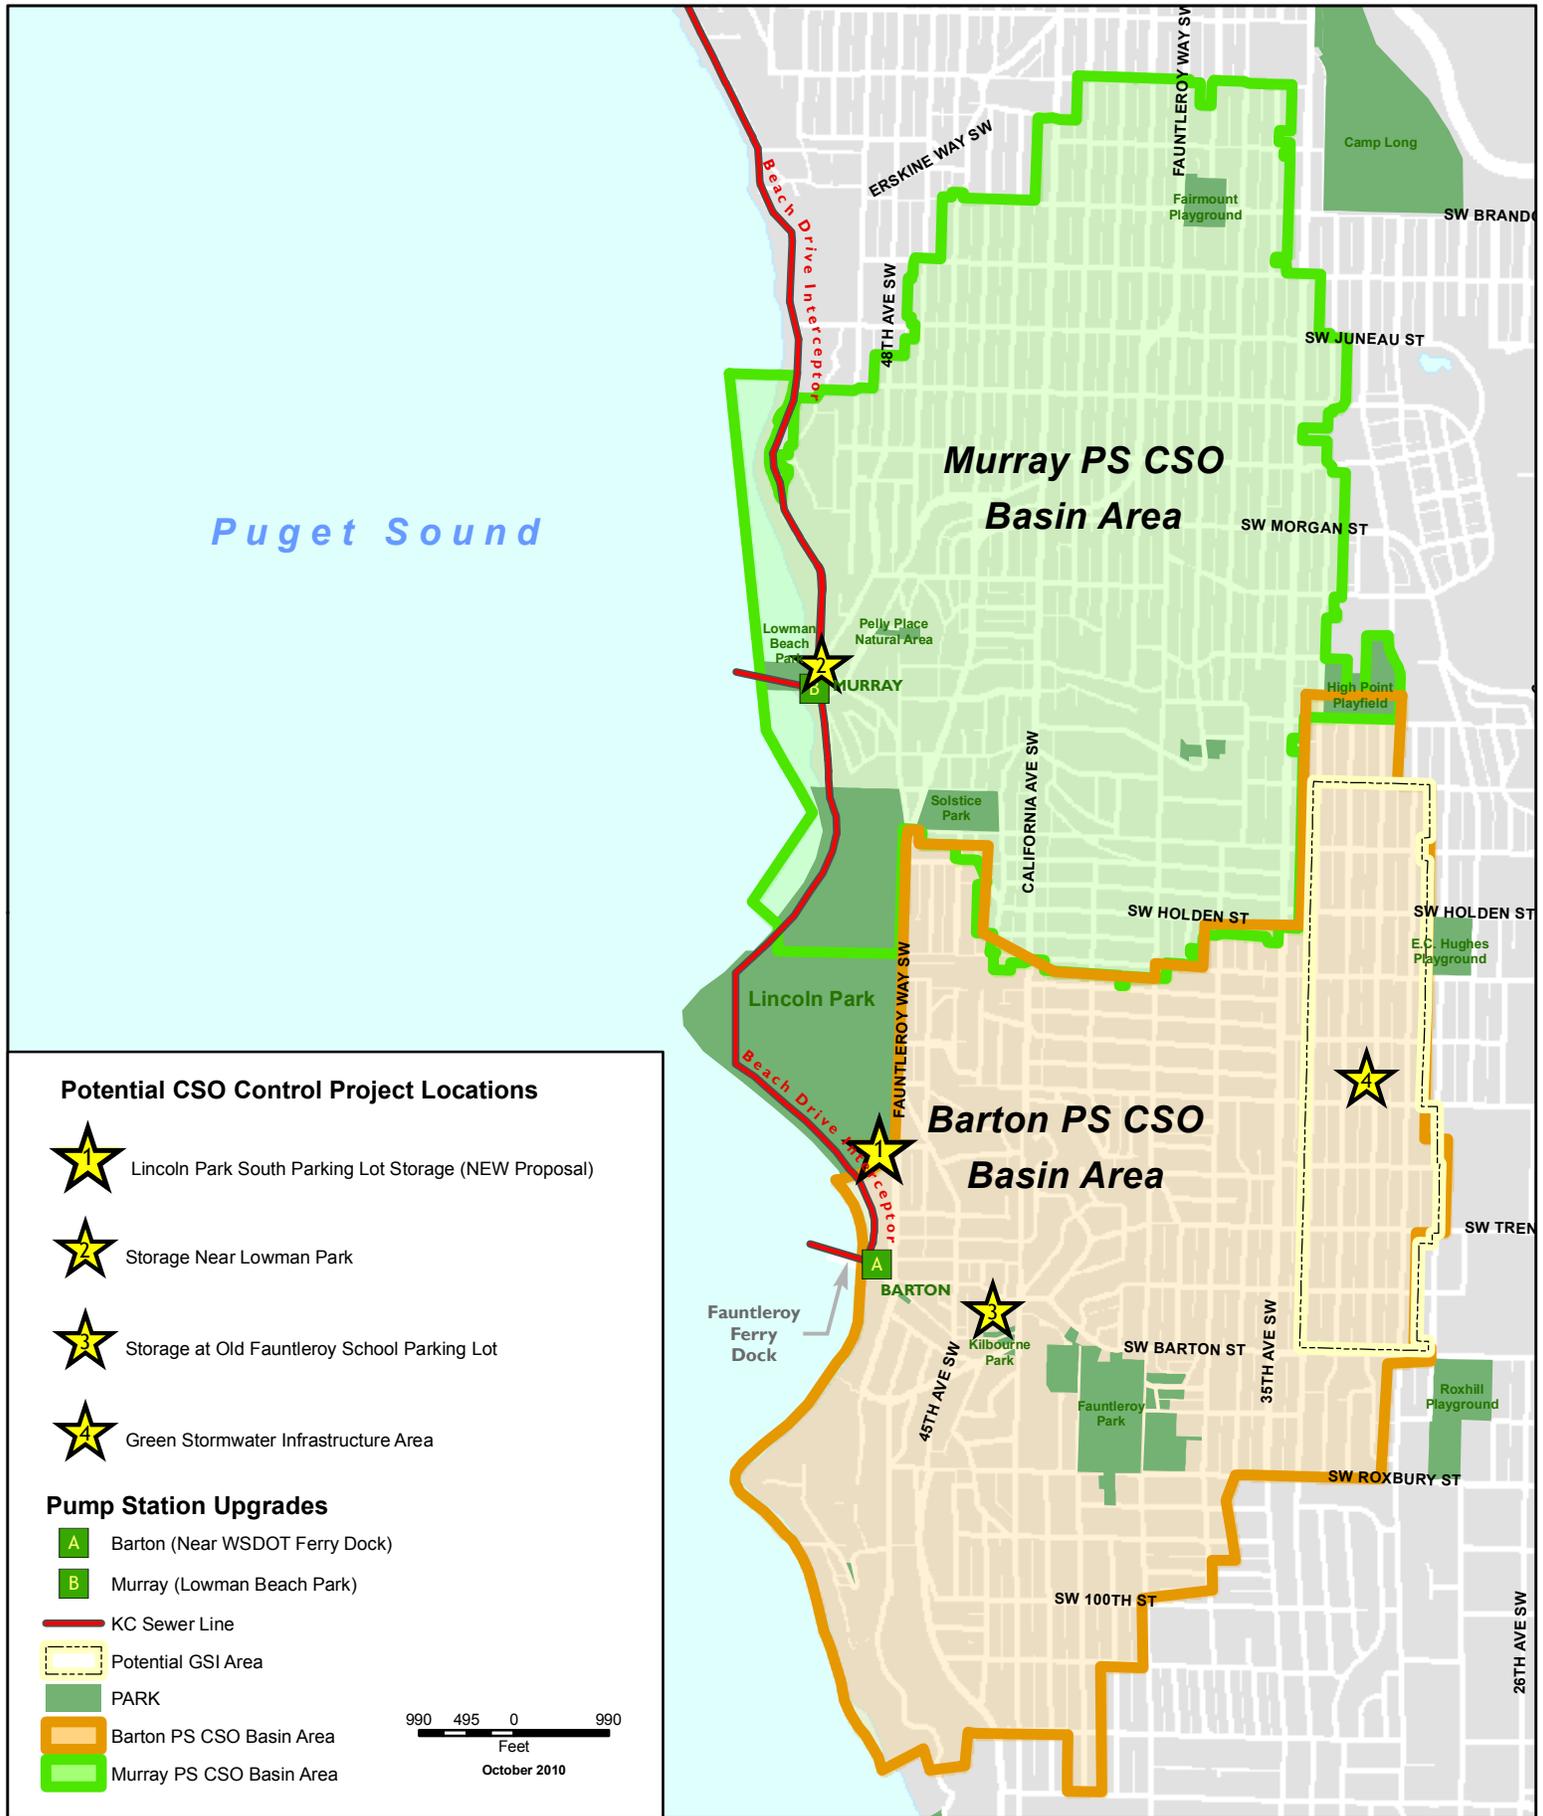

CSOs are discharges of untreated stormwater and sewage during heavy rains that can exceed the capacity of the sewer system in areas where stormwater and wastewater flows are combined. King County's goal is to reduce the number of CSOs each year from the Barton and Murray Pump Stations to no more than one untreated discharge per year on average at each station to meet state regulations.

### **Public Process Leads to New Alternative for Controlling CSOs**

King County has evaluated a number of alternatives for CSO control in West Seattle including upstream Green Stormwater Infrastructure, storage under the old Fauntleroy School or under Upper Fauntleroy Way near ferry dock, and several options near the Murray pump station: including private property across the street from Lowman Beach Park, under Beach Drive, and under Lowman Beach Park. This new alternative developed by the Murray CAG would directly impact Lincoln Park users and nearby neighbors. Come to this meeting to learn more and tell us what you think.

For special accommodations, please contact Kristine Cramer at 206-263-3184 or [kcramer@triangleassociates.com](mailto:kcramer@triangleassociates.com).

**Alternative Formats Available Upon Request.**

**Potential CSO Control Project Locations**

-  Lincoln Park South Parking Lot Storage (NEW Proposal)
-  Storage Near Lowman Park
-  Storage at Old Fauntleroy School Parking Lot
-  Green Stormwater Infrastructure Area

**Pump Station Upgrades**

-  Barton (Near WSDOT Ferry Dock)
-  Murray (Lowman Beach Park)
-  KC Sewer Line
-  Potential GSI Area
-  PARK
-  Barton PS CSO Basin Area
-  Murray PS CSO Basin Area
