

King County Murray Basin CSO Project
 Community Advisory Group Schedule & Topics – Proposed Dates

Meeting	Topics & Action Items
#1 – Wed., June 9, 2010	Introductions & getting started; Context for Murray Basin CSO project; goals; purpose of Advisory Committee; ground rules; tech session on June 19
Tech Session, June 19, 2010	Understanding the basin, elements of Sewer 101; nine alternatives; green stormwater infrastructure
#2 – Thu., June 24, 2010	Finalize Operating Ground Rules; brief overview of Sewer 101; Understanding the Barton and Murray Basins and their interconnectedness; CSO program overview; CSO program regulations and drivers overview from Washington State Department of Ecology
#3 – Thu., July 8, 2010	Summary of technical constraints and criteria for Barton and Murray CSO solutions; Barton CSO alternatives, (nine) Murray Basin CSO alternatives (nine); Data – storage volumes
#4 – Tue., August 3, 2010	Stormwater overview; green stormwater infrastructure; Seattle Parks policies; Begin to develop guiding principles;
#5 – Thu., August 19, 2010	Continue guiding principles development; review criteria applied to County alternatives; discuss any conflicts between guiding principles and County criteria; finalize guiding principles; determine methodology to apply guiding principles, technical constraints and criteria
#6 – Mon., August 30, 2010	Potential alternatives discussion (include nine County alternatives and community-suggested alternatives); begin to apply guiding principles and constraints/criteria to narrow list of alternatives
#7 – Wed., September 15, 2010	Deeper discussion of narrowed list of alternatives and potential refinements of alternatives; continue to narrow list. Develop initial draft of recommendations regarding potentially community-acceptable alternatives
#8 – Tue., September 28, 2010	Refine list of potentially community-acceptable alternatives; develop consensus on recommendations to deliver to County (Report)

Potential topics list:

- CSO program regulations and drivers overview from Washington State Department of Ecology
- Four approaches to CSO management – how/has King County considered them as options?
- Overview of Seattle Parks Department’s approach to siting infrastructure in Seattle parks
- Green stormwater infrastructure (GSI) – how has GSI been considered in Murray Basin as a means to reduce CSOs / required size of storage
- Murray Basin CSO alternatives (nine)
- Murray Basin CSO alternatives selection criteria
- Barton Basin CSO alternatives
- Sewer 101
- CSO program briefing
- Stormwater and how it contributes to CSOs
- Guiding principles for alternatives selection
- Community-suggested alternatives
- SPU overview of CSO program and connection to system
- Assumptions about storage capacity and overflows, data, and measurement of CSOs
