

Murray Basin CSO CAG

Community-suggested alternatives as of July 2, 2010

Suggested Alternative	Initial Response	CAG recommendation: Explore further? Yes or No
1. Install storage in Lincoln Park parking lot (mid-park location), size it large enough to manage overflows from Barton and Murray.		
2. Install storage in Lincoln Park near waterfront and Colman Pool.		
3. Explore combination of green infrastructure and additional storage in Barton to reduce peak flows to Murray		
4. Separate all sewer and stormwater flows in the basins.		
5. Use upgraded Barton Pump Station and pump overflow volumes up the hill to a higher point in the Murray Basin (example: Gatewood Elementary)		

Murray Basin CSO CAG

<p>6. Use Barton Pump Station to pump to Alki and Murray continues to pump north in a separate pipe</p>		
<p>7. Combine green stormwater infrastructure and storage in Murray Basin to reduce needed size of storage</p>		
<p>8. Purchase Dry Cleaners on California Ave SW. Install a storage tank with controls and expand the existing park space.</p>		
<p>9. Use Gatewood Elementary Playground to process gravity feed stormwater or use the space to collect combined system flow from upland.</p>		
<p>10. Direct the CSS flow to smaller holding tanks at five locations in the upper basin.</p>
