

# CSO Program

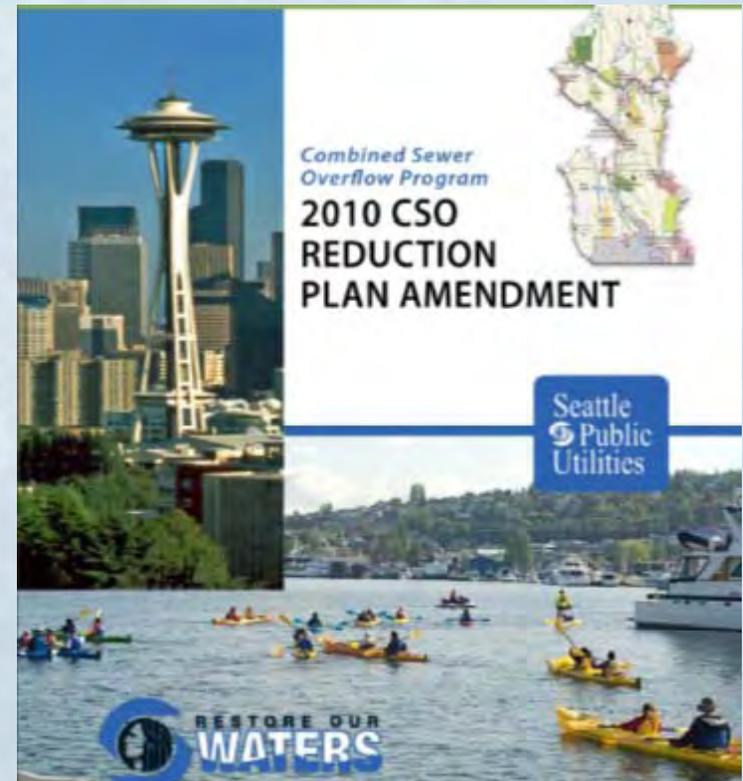

Seattle Public Utilities

July 8, 2010

# CSO Program Goals

- 💧 Finish the historic effort
- 💧 Improve water quality
- 💧 Comply with the Clean Water Act, state/federal regulations, permits & orders
- 💧 Minimize rate impacts
- 💧 Partner for cost-effective solutions

# Seattle Combined Sewer Overflows (CSOs)

- 90 Permitted CSO outfalls
- 100 million gallons CSO discharge annually (based on average of 2007-2009 data)
- About 200 CSO discharge events annually

# Focus on Next 5 Years

- Improve existing system - retrofits
- Construct three large storage projects
- Pilot green infrastructure projects
- Complete Long-Term Control Plan

# How SPU and County work together

- Share flow monitoring and system data
- Joint modeling
- Identify, evaluate, and implement joint projects where feasible and cost-effective
  - *Flow transfers*
  - *Green Stormwater Infrastructure (GSI)*
  - *Joint storage facilities*
- Consider boundary conditions and/or hydraulic limitations

# Siting Strategy for Facilities

*Available sites in order of preference:*

- Public right-of-way (R/W)
- SPU owned land
- City owned land (i.e., Parks, Fleets & Facilities, City Light, Office of Housing, surplus property, etc.)
- Publicly owned land (i.e., State, County, Port, etc.)
- Private property for sale (Commercial, residential, industrial)
- Private property acquisition with willing seller(s)
- Private property acquisition through eminent domain

# Public Involvement Strategy

*Customize public involvement process to the impact of the project*

- For complex projects:
  - *Identify and involve stakeholders early on*
  - *Hold early outreach briefings through existing venues*
  - *Set up advisory boards with key stakeholders during the alternatives analysis process to solicit public feedback*
  - *Coordinate the public involvement process with the environmental review process*
  - *Continue to reach out to affected parties during design and construction phases*
- Long-Term Control Plan
  - *Sounding Board*

# CSO Retrofits

- **Goal**: Optimize existing sewer system operations; maximize existing storage
- **Budget**: \$2 million per year budgeted for 2009-2015
- **Examples**:
  - *Raise weir heights (Compliance Order Requirement)*
  - *Install of actively controlled gates*
  - *Upgrade overflow structures*

- *Abandon or consolidate outfalls*
- *Improve hydraulic controls to optimize storage*

# Green Stormwater Infrastructure: Ballard

- Ballard GSI Phase 1
  - *Roadside Raingardens*
  - *Design 2009, Construction 2010, Monitoring 2011*
- Ballard GSI Phase 2 (2010-2015)
  - *Residential Rainwise (Private Property)*
  - *Green Alleys*
  - *Roadside Raingardens*
- Total Cost of GSI in Ballard: \$19 M
- Estimated Control Volume Reduction: 923,000 gallons

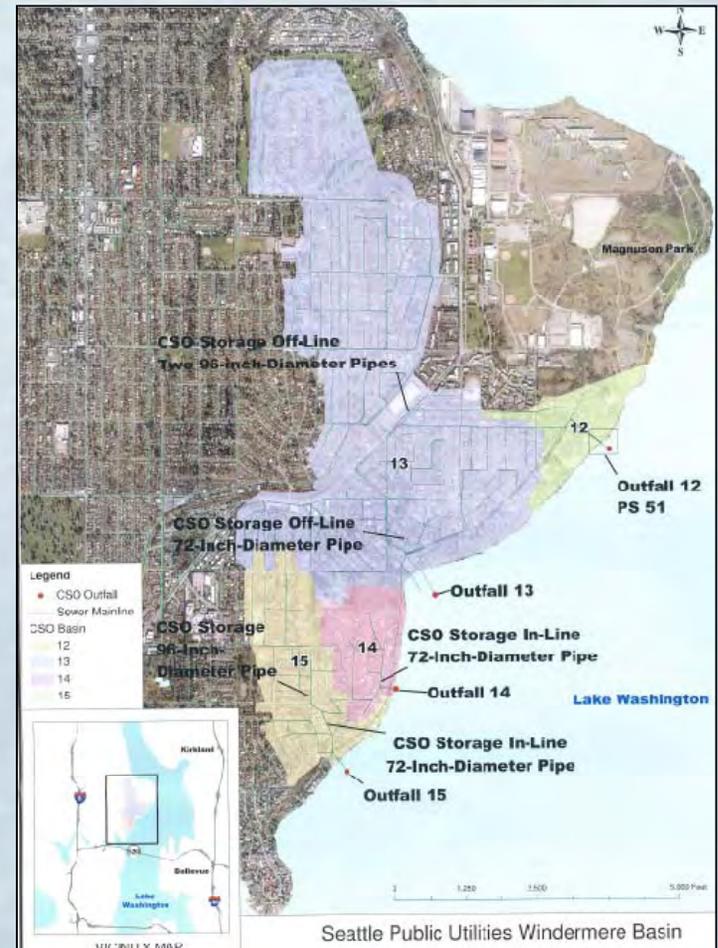

# Windermere Project

	2010	2011	2012	2013	2014	2015
<b>Preliminary Engineering</b>	■					
<b>Permitting</b>	■	■				
<b>Design</b>		■	■	■		
<b>Construction</b>			■	■	■	
<b>Close-Out</b>						■

## Milestones

- Facilities Plan to Ecology by end of July 2010
- SEPA DNS out for public comment/appeal in July 2010
- 30% Design Complete by end of November 2010
- 60% Design Complete by end of April 2011
- Type V Land-Use Decision in 2010-2011
- 90% Design Complete by end of August 2011
- 100% Design Complete by end of December 2011
- **Construction NTP by August 2012**
- **Substantial completion of construction by Summer 2014**
- Construction close-out: 2Q 2015

# Windermere CSO Project Preferred Site – Magnuson Park Parcel 9 (South of NE 65<sup>th</sup> St)

# Windermere Project Pipeline Alignment

- ◆ No impact to Burke-Gilman Trail
- ◆ Impacts to Sand Point Way: 1-2 lane closures for approximately 3-4 months
- ◆ Maintain access on NE 65<sup>th</sup> St and to boat ramp

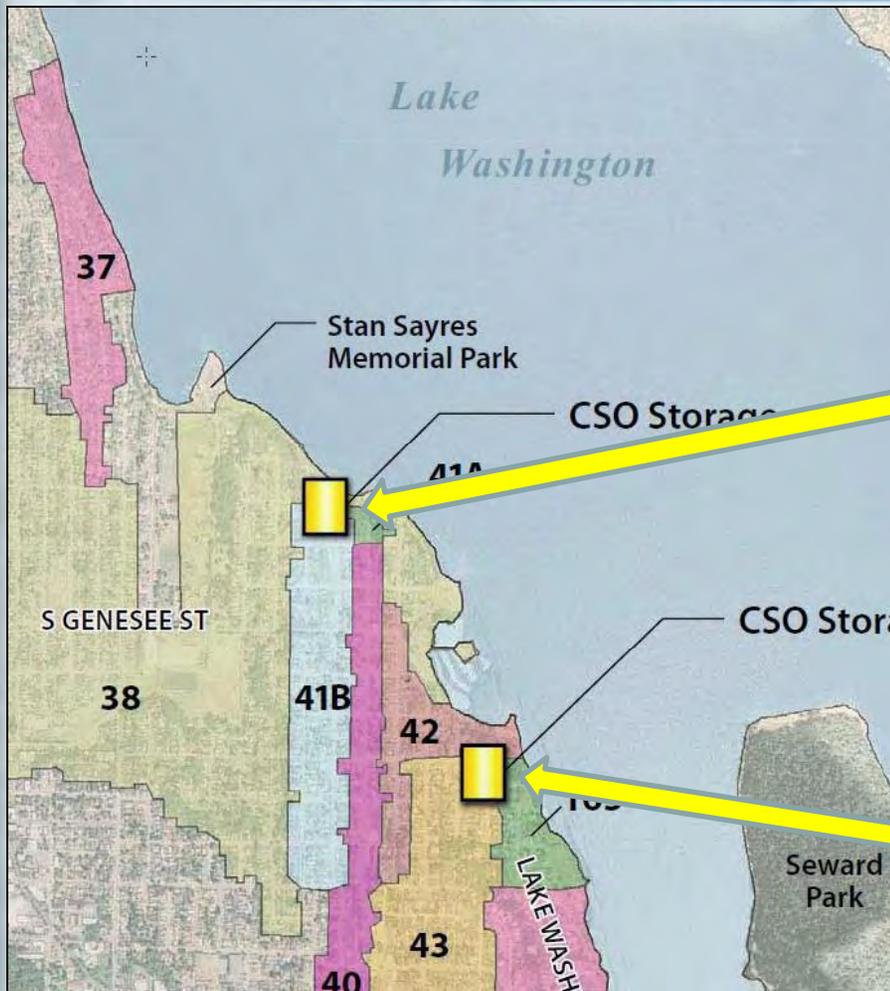

# Genesee CSO Reduction Project

- Top-Priority Basin
- 700 Acres
- Construction 2013-2015
- Reduces CSOs from 10 times to 1 time per year
- Storage Volumes:
  - Basins 40/41: 430,000 gal
  - Basin 43: 190,000 gal

# Genesee Area Alternative #3: Distributed Storage (Preferred)

Storage in Triangle Parking Lot

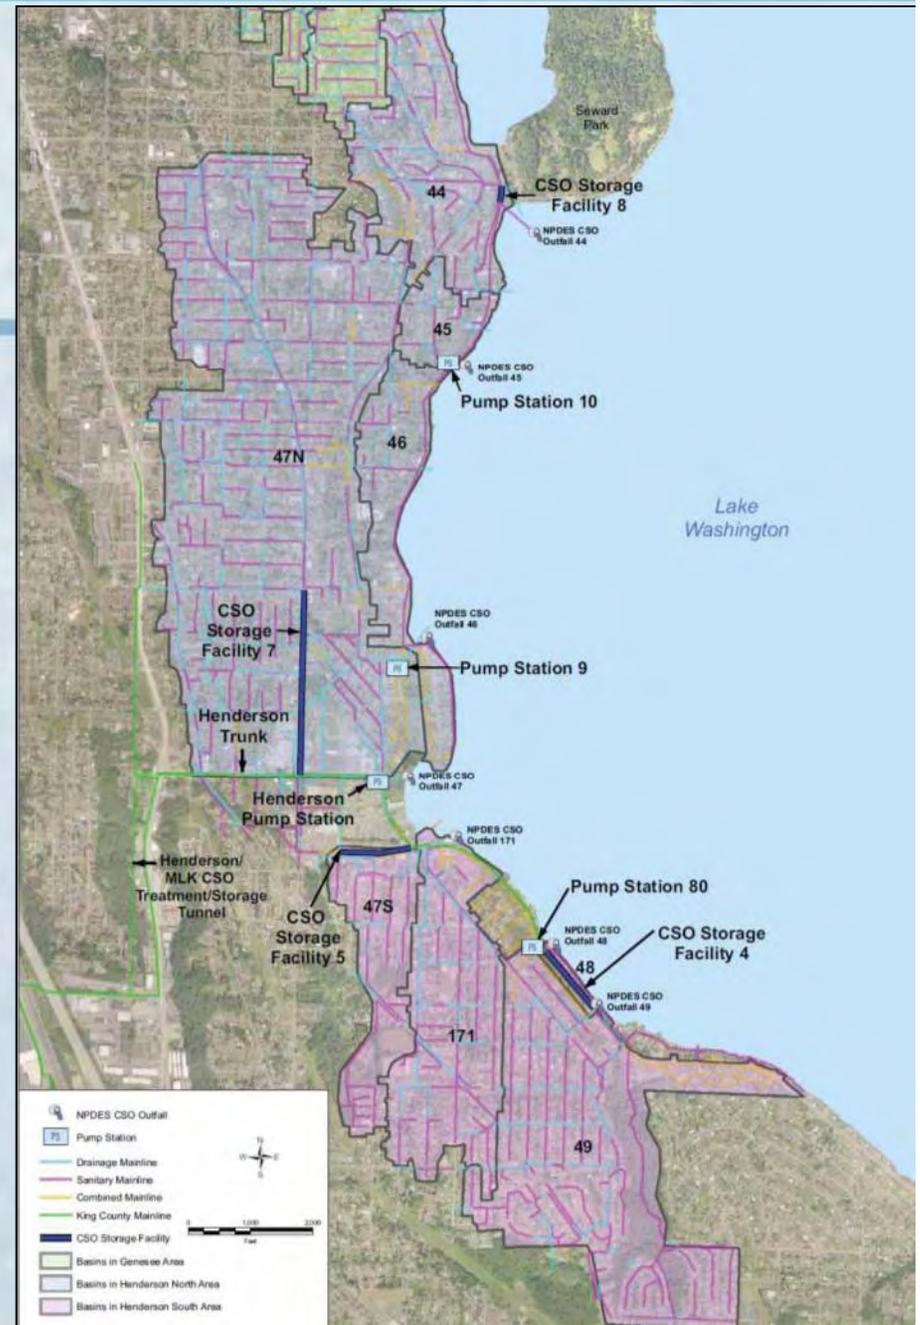

Storage along S. Alaska St

# Henderson CSO Reduction Project

- 💧 Top-Priority Basin
- 💧 1,800 Acres
- 💧 Construction 2014-2018
- 💧 Reduces CSOs from 17 times to 1 time per year
- 💧 Storage Volumes:
  - 💧 Basin 44: 2.4 Mgal
  - 💧 Basin 45: 200,000 gal
  - 💧 Basin 46: 350,000 gal
  - 💧 Basins 47/171: 260,000 gal
  - 💧 Basin 49: 160,000 gal

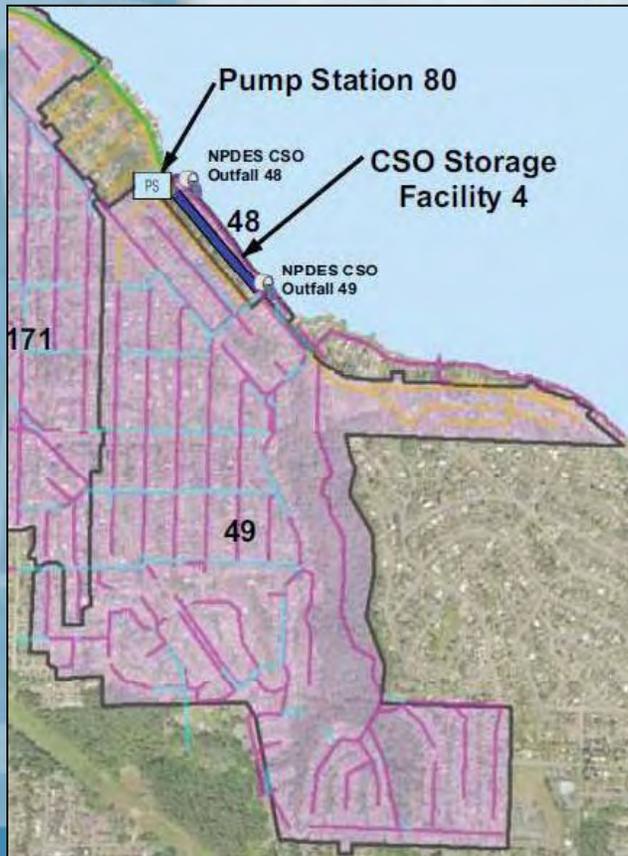

# S. Henderson CSO Reduction Projects

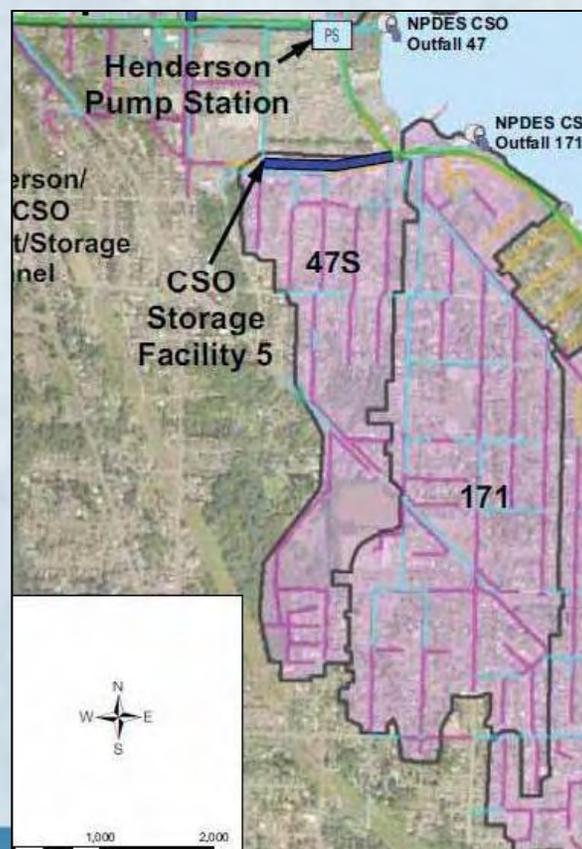

## Basin 49 Alternatives:

- (1) Retrofit and possible pipe upgrade to send more flow to King County (**Preferred**)
- (2) Storage (160,000 gallons) in Rainier Avenue

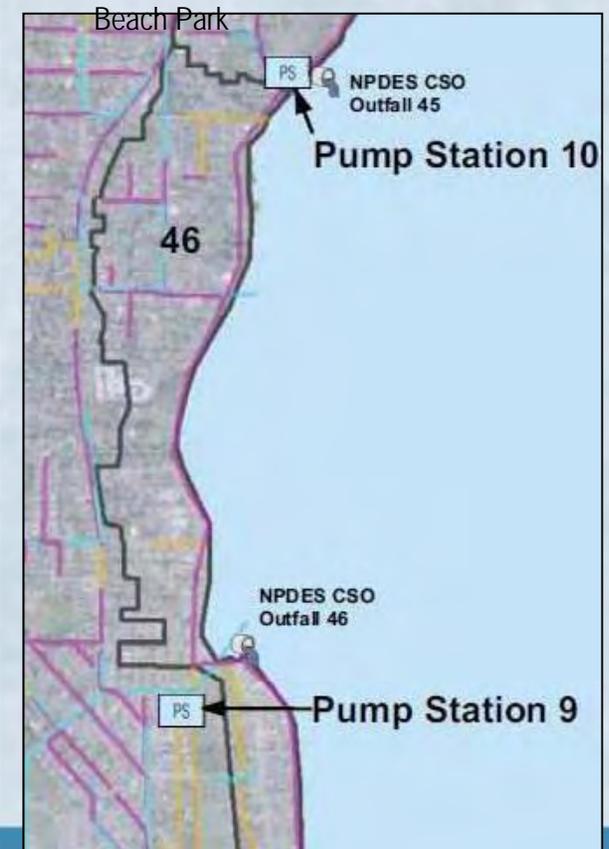

## Basin 47S/171 Alternatives:

- (1) Retrofit and possible pipe upgrade to send more flow to King County (**Preferred**)
- (2) Storage (260,000 gallons)

## Basin 46 Alternatives:

- (1) Upgrade pump station to send more flow to King County (**Preferred**)
- (2) Storage (350,000 gallons) in Pritchard Island Beach Park

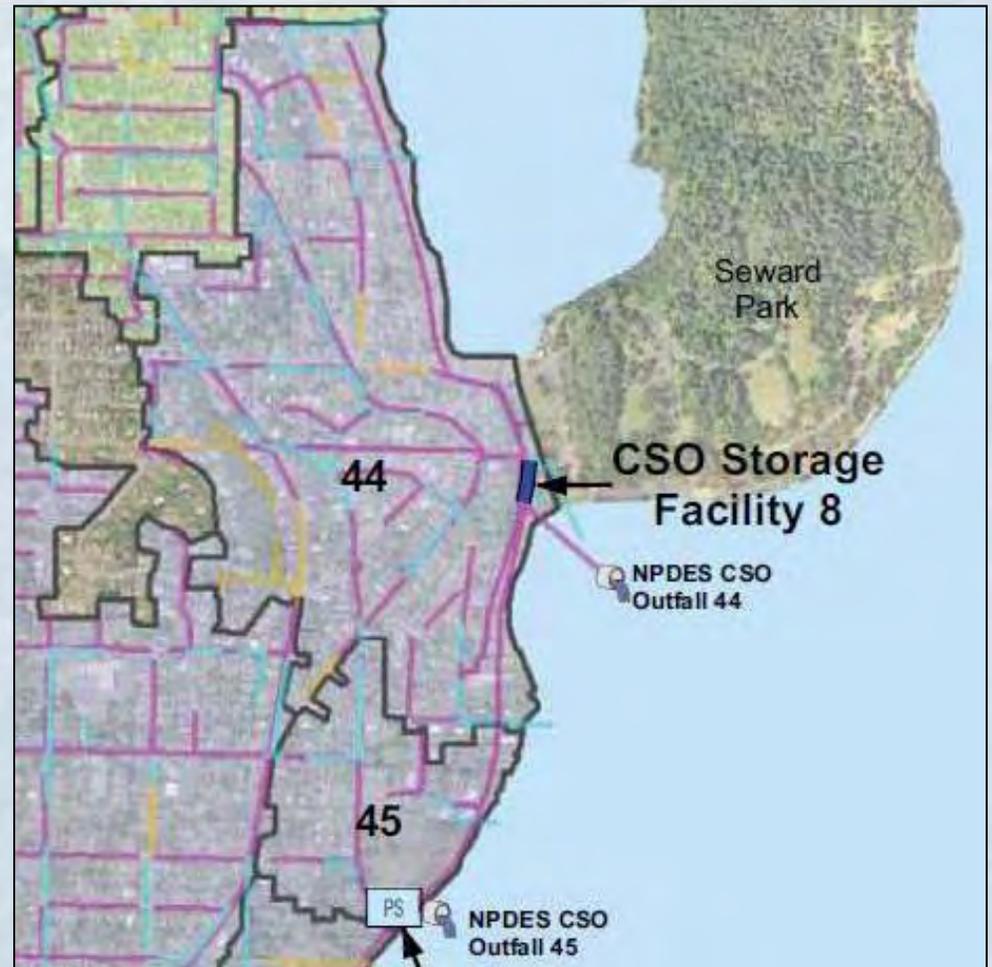

# North Henderson CSO Reduction Project

## Basins 44 and 45

### Alternatives:

- (1) Separate storage tanks in Basins 44 (2.4 million gallons) and Basin 45 (200,000 gallons)
- (2) Transfer Basin 44 flows south to Basin 45; storage (2.6 million gallons in Basin 45)
- (3) Tunnel Storage under Basins 44 and 45

# Questions and Discussion
