

Are you Firewise?

A home can be both wildfire safe and beautiful.

You will learn:

- Why screening the underside of your deck or porch can save your house.
- Which roofing products are least susceptible to fire.
- How good landscape design can prevent wildfire from engulfing your home.
- Best alternatives to outdoor burning: chip, bundle or compost brush.
- How to prevent wildfire from moving from the ground up into your trees.

How to get started...

Meet on Wednesday, January 25, 6:30 to 8:30 pm
Fall City Library
33415 SE 42nd Place, Fall City

Join us for an informative talk about the Firewise program and learn how to make your home and property more resistant to wildfire.

Fire professionals will explain Firewise principles and answer your questions on how to make the community safer.

Personal responsibility is key in being ready for emergencies. Protect your home and family by taking simple steps to becoming "Firewise." With a little planning and a bit of yard clean-up, you can create a wildfire defense zone at home.

Firewise is a national voluntary program that educates home and property owners about reducing the risks of wildfires. Learn more about it at: www.firewise.org.
