**Cost:** Free

**How to sign up:** [Register online](#)

**Credits:** 2 WSDA Pesticide License Recertification Credits

**Presenters:** Frances Lucero and Sasha Shaw, King County Noxious Weed Control Program

### AGENDA

This workshop will teach about invasive knotweed species including Japanese, Bohemian, Giant and Himalayan Knotweed. Topics to be covered in the first part include identification, biology, reproduction, distribution and impacts. The second part of the workshop will describe and evaluate control methods that are used for managing knotweed, including manual, mechanical, cultural, biological and chemical methods. Included in the chemical control section, we will give comprehensive instructions on the use and care of knotweed injection guns.

**KNOTWEED INJECTORS:** Individuals completing this workshop will be eligible to borrow the weed program's knotweed injectors to use on their own property.

**NOTE:** This workshop is being held immediately after the North Session of our annual noxious weed control seminar. If you would like to attend both the noxious weed seminar and the knotweed workshop, please register for each individually. For more information and to register, please visit our website at [www.kingcounty.gov/weeds](http://www.kingcounty.gov/weeds).
