

Watch for Knotweed on the Middle Fork Snoqualmie

Knotweed crowds riverbanks and destroys habitat. We are working to keep it off the Middle Fork. Please help us find it, so we can control it before it spreads.

IDENTIFICATION: Bamboo-like perennial, to 15 feet tall, reddish-green hollow stems, bright green leaves, oval or heart-shaped, attached alternately up stem, flowers tiny, white, in upright sprays. Dead stems reddish-brown in winter.

Send plant location to noxious.weeds@kingcounty.gov (please be as precise as possible and include contact info)

For information on weeds:
kingcounty.gov/weeds, 206-296-0290

To volunteer on the Middle Fork:
mtsgreenway.org, 206-812-0122

Watch for Butterfly Bush on the Middle Fork Snoqualmie

Butterfly bush crowds out native plants and destroys habitat. We are working to keep it off the Middle Fork. Please help us find it, so we can control it before it spreads.

IDENTIFICATION: Deciduous shrub with arching branches, to 15 feet tall, drooping flower spikes with tiny purple flowers, leaves dark green on top, whitish underneath, opposite on stems (unlike native willows). Older bark is grayish and peeling.

Send plant location to noxious.weeds@kingcounty.gov (please be as precise as possible and include contact info)
