

Master Table of Contents

Volume 1 – FEIS Text

Fact Sheet

Summary

Chapter 1 Project Purpose and Background

Chapter 2 Description of Proposed Action and Alternatives

Chapter 3 Air Quality

Chapter 4 Geology and Hydrogeology

Chapter 5 Terrestrial Plants and Animals

Chapter 6 Marine Habitat and Fisheries

Chapter 7 Noise

Chapter 8 Transportation

Chapter 9 Land and Shoreline Use

Chapter 10 Environmental Health and Safety

Chapter 11 Light, Glare, and Aesthetics

Chapter 12 Recreation

Chapter 13 Cumulative Effects and Interdisciplinary Analysis

List of Acronyms

Distribution List

Volume 2 – Appendices

Appendix A Geology and Groundwater Report by Terra Associates, Inc.
(included in DEIS and incorporated by reference in FEIS)

Appendix B Environmental Soil Sampling Memorandum by Terra
Associates, Inc. (included in DEIS and incorporated by reference in
FEIS)

Appendix C Mitigation Report for Contaminated Soils (included in DEIS and
incorporated by reference with Erratum in FEIS)

- Appendix D 2nd Addendum for 1998 Amendments to Comp Plan (included in DEIS and incorporated by reference in FEIS)
- Appendix E Ground Water Monitoring Results by Associated Earth Sciences, Inc. (included in DEIS and incorporated by reference with Addendum in FEIS)
- Appendix F Dock Assessment by Symonds Consulting Engineers
- Appendix G Dock Assessment by Reid Middleton
- Appendix H Dock Assessment by Peratrovich, Nottingham & Drage
- Appendix I Department of Ecology Fact Sheets
- Appendix J Eelgrass/Macroalgae Survey Report
- Appendix K Dive Survey Report, Dupont Barge-Loading Facility
- Appendix L U.S. Coast Guard Comments on DEIS
- Appendix M Environmental Noise Analysis

Volume 3 – Comments and Responses, Part 1

- Introduction to Comments and Responses
- Summary
- Chapter 1 Project Purpose and Background
- Chapter 2 Description of Proposed Action and Alternatives
- Chapter 3 Air Quality
- Chapter 4 Geology and Hydrogeology
- Chapter 5 Terrestrial Plants and Animals

Volume 4 – Comments and Responses, Part 2

- Chapter 6 Marine Habitat and Fisheries
- Chapter 7 Noise
- Chapter 8 Transportation
- Chapter 9 Land and Shoreline Use
- Chapter 10 Environmental Health and Safety
- Chapter 11 Light, Glare, and Aesthetics
- Chapter 12 Recreation
- Chapter 13 Cumulative Effects and Interdisciplinary Analysis
- Appendices

Volume 5 – Comment Letters, Part 1

Comments from Agencies

Comments from Vashon – Maury Island Community Council

Consultant Reports

Environmental Organizations, Citizen's Groups, and Private Companies

Volume 6 – Comment Letters, Part 2

Written Comments

E-Mail Comments

Handwritten Comment Forms

Table of Contents

Volume 1 – FEIS Text

Summary	S-1
Introduction	S-1
King County Action Being Considered	S-1
Key SEPA Milestones Completed	S-1
Major Changes Between the DEIS and FEIS	S-2
Proposal Objectives	S-3
Summary of Proposal and Alternatives	S-4
Description of the Proposed Action	S-4
Alternative 1- Reduced Barging Hours, Scenario 1	S-5
Alternative 2 - Reduced Barging Hours, Scenario 2	S-5
No-Action Alternative	S-6
Mitigation Alternatives	S-6
Significant Areas of Controversy and Issues to be Resolved	S-8
Environmental Setting	S-9
The Island Environment	S-9
The Rural Environment	S-9
The Shoreline Environment	S-10
Historic Context of Mining	S-10
Forest and Wildlife	S-11
Arsenic and Other Contaminants	S-11
Phased Review	S-11
Summary of Impacts, Mitigation, and Significant Unavoidable Adverse	
Impacts	S-11
Overview of Key Impacts	S-12
Evaluation of Impacts Based on SEPA Criteria	S-13

Chapter 1	Project Purpose and Background	1-1
1.1	Introduction.....	1-1
1.1.1	Why a Decision is Needed	1-1
1.1.2	The SEPA Process	1-3
1.1.3	Who is Preparing this EIS and Making the Decision	1-5
1.2	Overview of Applicant’s Proposal	1-5
1.2.1	Applicant’s Objectives	1-5
1.2.2	Applicant’s Proposal	1-6
1.2.3	Other Permits Required for the Applicant’s Proposal.....	1-7
1.2.4	Existing Permits	1-8
1.2.5	How Mitigation is Addressed in this EIS.....	1-9
1.3	Existing Site Characteristics	1-11
1.3.1	Geology/Mineral Resources.....	1-11
1.3.2	Topography.....	1-11
1.3.3	Vegetation.....	1-12
1.3.4	Land Use Designations and Zoning.....	1-12
1.3.5	Site Access and Utilities.....	1-12
1.4	Past and Current Mining Activity.....	1-12
1.5	Citations.....	1-13
Chapter 2	Description of Proposed Action and Alternatives.....	2-1
2.1	Introduction.....	2-1
2.2	Description of the Proposed Action	2-1
2.2.1	Scale of Operation	2-1
2.2.2	Clearing and Ground Preparation	2-2
2.2.3	Facilities and Equipment.....	2-3
2.2.4	Progression of Mining	2-9
2.2.5	Containment Procedures for Contaminated Soils	2-9
2.2.6	Trucking and Barging.....	2-11
2.2.7	Hours of Operation.....	2-12
2.2.8	Employment.....	2-12
2.2.9	Reclamation	2-12
2.3	Alternative 1- Reduced Barging Hours, Scenario 1	2-15
2.3.1	Scale of Operation	2-15
2.3.2	Clearing and Ground Preparation	2-16
2.3.3	Facilities and Equipment.....	2-16
2.3.4	Progression of Mining	2-16

2.3.5	Containment Procedures for Contaminated Soils	2-16
2.3.6	Trucking and Barging	2-16
2.3.7	Hours of Operation.....	2-17
2.3.8	Employment	2-17
2.3.9	Reclamation	2-17
2.4	Alternative 2 - Reduced Barging Hours, Scenario 2	2-17
2.4.1	Scale of Operation	2-17
2.4.2	Clearing and Ground Preparation	2-18
2.4.3	Facilities and Equipment.....	2-18
2.4.4	Progression of Mining	2-18
2.4.5	Containment Procedures for Contaminated Soils	2-19
2.4.6	Trucking and Barging	2-19
2.4.7	Hours of Operation.....	2-19
2.4.8	Employment	2-19
2.4.9	Reclamation	2-19
2.5	No-Action Alternative	2-20
2.5.1	No-Action Alternatives under SEPA.....	2-20
2.5.2	Facilities and Operation	2-20
2.5.3	Containment Procedures for Contaminated Soils	2-22
2.5.4	Trucking and Barging	2-22
2.5.5	Reclamation	2-22
Chapter 3	Air Quality.....	3-1
3.1	Primary Issues.....	3-1
3.2	Affected Environment	3-1
3.2.1	Regulatory Overview.....	3-1
3.2.2	Existing Air Quality	3-2
3.3	Impacts.....	3-3
3.3.1	Would fugitive dust resulting from the project exceed regulatory standards at the property line or at nearby residential locations?	3-3
3.4	Adverse Impacts and Mitigation.....	3-9
3.4.1	Significance Criteria	3-9
3.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	3-9
3.4.3	Remaining Adverse Impacts and Additional Measures.....	3-11
3.5	Cumulative Impacts	3-11

3.6	Significant Unavoidable Adverse Impacts	3-12
3.7	Citations.....	3-12
Chapter 4	Geology and Hydrogeology	4-1
4.1	Primary Issues.....	4-1
4.2	Affected Environment	4-1
4.2.1	Information Sources	4-2
4.2.2	Geology.....	4-4
4.2.3	Surface Water	4-7
4.2.4	Groundwater	4-7
4.3	Impacts.....	4-14
4.3.1	Would mining as proposed affect recharge of the aquifer system or affect the availability of water to residents on Vashon/Maury Islands?.....	4-14
4.3.2	Would mining affect groundwater quality?	4-19
4.3.3	Would the mining activity breach an aquifer or otherwise impact adjacent groundwater wells being used by local residents?.....	4-20
4.3.4	<u>New Section</u> : Would the proposed mining cause saltwater intrusion to the fresh water aquifer?.....	4-21
4.3.5	<u>New Section</u> : Would the proposed mining activity create slope stability problems?	4-22
4.3.6	<u>New Section</u> : Would proposed mining cause surface water runoff to flow off the site?	4-23
4.4	Adverse Impacts and Mitigation.....	4-24
4.4.1	Significance Criteria	4-24
4.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	4-25
4.4.3	Remaining Adverse Impacts and Additional Measures.....	4-26
4.5	Cumulative Impacts	4-30
4.6	Significant Unavoidable Adverse Impacts	4-30
4.7	Citations.....	4-31
Chapter 5	Terrestrial Plants and Animals	5-1
5.1	Primary Issues.....	5-1
5.2	Affected Environment	5-2
5.2.1	Threatened, Endangered, and other Sensitive Animal Species	5-2
5.2.2	Plant Communities and Habitat.....	5-10

5.3	Impacts.....	5-15
5.3.1	Would the project adversely affect a plant or animal listed or proposed for listing under the Endangered Species Act, or any other species listed by the state, tribes, or King County as sensitive?	5-15
5.3.2	What would the loss of existing madrone imply in terms of (1) regulations, (2) functional values of madrone forest on the site, and (3) regional distribution of madrone?.....	5-19
5.3.3	Over the life of the mine, what is the overall effect on habitat of reactivating high-production mining on the site?	5-22
5.4	Adverse Impacts and Mitigation.....	5-25
5.4.1	Significance Criteria	5-25
5.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	5-25
5.4.3	Remaining Adverse Impacts and Additional Measures.....	5-26
5.5	Cumulative Impacts	5-35
5.6	Significant Unavoidable Adverse Impacts	5-35
5.7	Citations.....	5-36

Chapter 6 Marine Habitat and Fisheries 6-1

6.1	Primary Issues.....	6-1
6.2	Affected Environment	6-2
6.2.1	Physical Components	6-3
6.2.2	Biological Components	6-4
6.2.3	Other Considerations of the Marine Environment	6-12
6.3	Impacts.....	6-12
6.3.1	How would shading from barges at the dock adversely affect eelgrass or other marine biological communities?	6-12
6.3.2	How would accidental spillage of sand and gravel during barge loading adversely affect marine life under or near the dock and barges?.....	6-15
6.3.3	What would be the potential for petroleum spills from increased marine equipment activity?	6-18
6.3.4	Would stormwater, propeller wash, or barge grounding affect marine organisms?	6-20
6.3.5	Would removing a portion of the bluff during mining change the deposition/ erosion dynamics of the beach?	6-26
6.3.6	What effect would the project have on geoduck clam harvest by the Puyallup Tribe?	6-27

6.3.7	Would the noise and vibration from pile driving or barge loading affect salmon and other marine animals, including whales?	6-28
6.3.8	How would dock repairs and/or maintenance impact marine habitats?	6-33
6.3.9	<u>New Section:</u> How would artificial light from the project affect marine life?	6-37
6.4	Adverse Impacts and Mitigation.....	6-38
6.4.1	Significance Criteria	6-38
6.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	6-38
6.4.3	Remaining Adverse Impacts and Additional Measures.....	6-39
6.5	Cumulative Impacts	6-52
6.6	Significant Unavoidable Adverse Impacts	6-53
6.7	Citations.....	6-56
6.7.1	Printed References	6-56
6.7.2	Personal Communications	6-62
Chapter 7	Noise	7-1
7.1	Primary Issues.....	7-1
7.2	Affected Environment	7-1
7.2.1	Background Information on Noise.....	7-1
7.2.2	Regulatory Overview.....	7-4
7.2.3	Existing Sound Levels.....	7-5
7.3	Impacts.....	7-5
7.3.1	Would noise levels resulting from the project exceed regulatory standards at nearby residences?	7-5
7.4	Adverse Impacts and Mitigation.....	7-9
7.4.1	Significance Criteria	7-9
7.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	7-9
7.4.3	Remaining Adverse Impacts and Additional Measures.....	7-10
7.5	Cumulative Impacts	7-11
7.6	Significant Unavoidable Adverse Impacts	7-11
7.7	Citations.....	7-12

Chapter 8	Transportation.....	8-1
8.1	Primary Issues.....	8-1
8.2	Affected Environment	8-1
8.2.1	Truck Traffic.....	8-1
8.2.2	Marine Traffic.....	8-2
8.3	Impacts.....	8-6
8.3.1	Truck Traffic.....	8-6
8.3.2	Marine Traffic.....	8-8
8.4	Adverse Impacts and Mitigation.....	8-12
8.4.1	Significance Criteria	8-12
8.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	8-13
8.4.3	Remaining Adverse Impacts and Additional Measures.....	8-13
8.5	Cumulative Impacts	8-14
8.6	Significant Unavoidable Adverse Impacts	8-15
8.7	Citations.....	8-15
8.7.1	Printed References	8-15
8.7.2	Personal Communications	8-16
Chapter 9	Land and Shoreline Use	9-1
9.1	Primary Issues.....	9-1
9.2	Affected Environment	9-1
9.2.1	Current Land Uses.....	9-1
9.2.2	Growth Management Act, King County Comprehensive Plan, and Vashon Community Plan.....	9-2
9.2.3	King County Zoning Code (Title 21A)	9-6
9.2.4	King County Grading Permit	9-11
9.2.5	Washington State Surface Mining Act (RCW Chapter 78.44)	9-11
9.2.6	Washington State Shoreline Management Act.....	9-12
9.2.7	King County Shoreline Master Program.....	9-13
9.2.8	Washington State Department of Natural Resources Aquatic Lands Lease	9-13
9.3	Impacts.....	9-14
9.3.1	Is the Applicant’s proposal consistent with applicable land use policies and regulations?.....	9-14
9.3.2	What land use changes would occur directly or indirectly, to the project site and adjacent lands, as a result of the proposal?.....	9-16

9.4	Adverse Impacts and Mitigation.....	9-17
9.4.1	Significance Criteria	9-17
9.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	9-17
9.4.3	Remaining Adverse Impacts and Additional Measures.....	9-19
9.5	Cumulative Impacts	9-20
9.6	Significant Unavoidable Adverse Impacts	9-20
9.7	Citations.....	9-21
9.7.1	Printed References	9-21
9.7.2	Personal Communications	9-21
Chapter 10	Environmental Health and Safety	10-1
10.1	Primary Issues.....	10-1
10.2	Affected Environment	10-1
10.2.1	Background.....	10-1
10.2.2	Existing Contaminant Distribution	10-2
10.3	Impacts.....	10-5
10.3.1	Would mining remobilize the existing arsenic in the site topsoils as air contamination and dust?	10-5
10.3.2	Would mining remobilize the existing arsenic in the site topsoils as surface water contamination?	10-6
10.3.3	Would arsenic be present in soils to be sold and exported from the site?	10-7
10.3.4	Would arsenic enter groundwater as a result of the proposal?	10-8
10.3.5	Would tug propeller wash stir up contaminated sediments and harm endangered fish species or other marine life?	10-8
10.4	Adverse Impacts and Mitigation.....	10-9
10.4.1	Significance Criteria	10-9
10.4.2	Measures Already Proposed by the Applicant or Required by Regulation.....	10-10
10.4.3	Remaining Adverse Impacts and Additional Measures.....	10-13
10.5	Cumulative Impacts	10-17
10.6	Significant Unavoidable Adverse Impacts	10-17
10.7	Citations.....	10-18
10.7.1	Printed References	10-18

Chapter 11 Light, Glare, and Aesthetics.....	11-1
11.1 Primary Issues.....	11-1
11.2 Affected Environment	11-1
11.3 Impacts.....	11-3
11.3.1 What aesthetic changes would occur in the character of the existing landscape on the mine site?	11-3
11.3.2 How would the reintroduction of barging affect the visual environment?	11-10
11.4 Adverse Impacts and Mitigation.....	11-11
11.4.1 Significance Criteria	11-11
11.4.2 Measures Already Proposed by the Applicant or Required by Regulation.....	11-11
11.4.3 Remaining Adverse Impacts and Additional Measures.....	11-12
11.5 Cumulative Impacts	11-13
11.6 Significant Unavoidable Adverse Impacts	11-13
 Chapter 12 Recreation	 12-1
12.1 Primary Issues.....	12-1
12.2 Affected Environment	12-1
12.2.1 Existing Recreational Facilities in the Vicinity	12-1
12.2.2 Informal Recreational Use of the Project Site	12-2
12.3 Impacts.....	12-3
12.3.1 Would the project interfere with the public use and enjoyment of any formal or informal recreational sites in the area?	12-3
12.4 Adverse Impacts and Mitigation.....	12-5
12.4.1 Significance Criteria	12-5
12.4.2 Measures Already Proposed by the Applicant or Required by Regulation.....	12-5
12.4.3 Remaining Adverse Impacts and Additional Measures.....	12-5
12.5 Cumulative Impacts	12-6
12.6 Significant Unavoidable Adverse Impacts	12-7
 Chapter 13 Cumulative Effects and Interdisciplinary Analysis	 13-1
13.1 Primary Issues.....	13-1
13.2 Affected Environment	13-1

13.3 Impacts.....	13-2
13.3.1 How do project-specific impacts relate among the various elements of the environment?	13-2
13.3.2 How do resource-specific mitigation measures affect impacts and mitigation for other elements of the environment?	13-3
13.4 Cumulative Effects.....	13-4

List of Acronyms	LA-1

List of Tables and Figures

Note to Readers: Tables and figures are located at the end of each chapter.

Table

S-1	Comparison of Features among Alternatives
S-2	Summary of Adverse Impacts
2-1	Comparison of Features among Alternatives
2-2	Estimated Repairs Needed for Dock
3-1	Ambient Air Quality Standards
3-2	Production Rates Used for Emission Calculations
3-3	Peak Annual PM10 Emission Rates Used to Model Potential Impacts
3-4	Maximum Modeled PM10 Concentrations
5-1	Proposed Action – Effect on Site Vegetation
6-1	Summary of Marine Habitat Zones Adjacent to the Project Site
6-2	Extent of Eelgrass Habitat at Proposed Project Site
6-3	Marine Algae, Plant, and Animal Species Observed Adjacent to the Maury Island Gravel Mine Site
6-4	Sensitive Marine Species in the Vicinity of the Project Area
6-5	Compliance Analysis of Washington Administrative Code Guidelines Related to Dock Construction
7-1	Weighted Sound Levels and Human Response
7-2	King County Environmental Noise Limits
7-3	Existing Sound Levels
7-4	Typical Construction Equipment Sound Levels
7-5	Summary of Source Sound Levels
7-6	Operational Sound Levels—Calm Conditions

- 7-7 Operational Sound Levels—with 2 m/s Wind
- 8-1 Summary of Roads in the Vicinity of the Project Site
- 10-1 Analytical Test Results for Surface Soil Samples on the Glacier Northwest Site
- 10-2 Analytical Test Results for Sand and Gravel Samples on Glacier Northwest Site

Figure

- 1-1 Vicinity Map of Southern Puget Sound
- 1-2 Aerial Infrared Photograph of Maury Island and Vicinity
- 1-3 Vicinity Map of Maury Island
- 1-4 Closeup Aerial Infrared Photograph of Project Site and Vicinity
- 1-5 Existing Site Conditions
- 2-1 Mining Phasing Plan
- 2-2A Final Site Contours Part 1
- 2-2B Final Site Contours Part 2
- 2-3 Reclamation Plan
- 2-4 Main Components of Dock Structure
- 3-1 Air Quality Modeling Scenarios
- 4-1 Groundwater Contours – Static Water Level as of February 19, 1999
- 4-2 Groundwater Contours – Static Water Level as of June 22, 1999
- 4-3 Groundwater Contours – Static Water Level as of September 20, 1999
- 4-4 Groundwater Contours – Static Water Level as of December 27, 1999
- 4-5 Groundwater Contours and Flow Direction in Principal Aquifer
- 5-1 Bluff Madrone Forest Adjoining Old Mine Habitat
- 5-2 Madrone Mixed Forest
- 5-3 Douglas-fir Mixed Forest
- 5-4 Old Mine Habitat
- 5-5 Current Vegetation Types on the Project Site

- 5-6 Historical Pattern of Vegetation Development at the Mine Site, 1944 to 1998
- 6-1a Cross Section at Low Tide of Nearshore Area Potentially Affected by Proposal
- 6-1b Front View at Low Tide of the Barge and Loading Facility
- 6-1c As-Built Drawing of Dock and Dolphins from Above
- 6-2a Approximate Location of Survey Transects, Bathymetry, and Eelgrass Beds
- 6-2b Results of Nearshore Environment Characterization Study
- 6-3 Three-Dimensional View of Nearshore Bathymetry Adjacent to Project Site
- 6-4 Effect of Solar Angle on Shading
- 7-1 Sound Level Measurement and Receptor Locations
- 8-1 Major Roadways in Project Vicinity
- 8-2 Principal Marine Transport Routes in the Vicinity of the Project Site
- 8-3 Washington State Ferry System Routes on Puget Sound
- 9-1 Comprehensive Plan Land Use Designations
- 9-2 King County Zoning
- 10-1 Locations of Surface Soil Samples
- 10-2 Locations of Subsurface Resource Samples
