A **Primary Regional Trail** is a shared-use (multi-purpose), regionally-significant, off-road facility that provides recreational opportunities and enhances regional mobility. Primary trails are facilities that meet regional trail development guidelines for size, grade, and other characteristics and are suitable for multi-purpose use (e.g., bicycling, hiking, jogging, skating, etc.). Some trails may also be appropriate for equestrian use.

A **Secondary Regional Trail** is a regionally significant off-road facility that provides connections essential to the Regional Trail System but which may not meet all of the criteria for shared-use, size, grade, surfacing, and other characteristics. While not being appropriate for all uses, secondary trails may provide important connections within the Regional Trail System. Some trails may also be appropriate for equestrian use.
