

## **Earth Smart: Choices for our Planet**

**Here's what some teachers and students are saying about the assembly:**

### ***White Center Heights Elementary (Highline School District)***

Thank you so much for presenting the Earth Smart Adventures for our school. Your ability to communicate an important ecological message to all of us, not just to children, is amazing and entertaining. We loved your energy, your passion for Mother Earth, and your great skill in fine tuning the performance to fit the ages of the audience.

**-Greta Salmi, Principal**

I learned that anyone at anytime can be a smart shopper.

**-Cindy**

I like the part when you dance, sing and act. That was a great show. Thanks for coming!

**-Cathy**

I think your presentation was awesome. Thank you for coming to White Center Heights to show us how many things we throw away can be reused or recycled rather than throwing it in the garbage.

**-Tony**

I like the assembly because it was funny. I learned that they use trees, metal, oil and water to make things.

**-Andy**

### ***Mark Twain Elementary (Lake Washington School District)***

The students and the teachers loved it. Not only was it entertaining, but so informational – we learned a ton. We used the assembly in conjunction with our new recycling program at school and the assembly really reinforced what we have been teaching. We've already seen a change with what the students are doing to *reduce, reuse, recycle* and *rethink*.

Angela and Terence were fabulous. They really know how to keep the students engaged; I don't think the students even knew that this was an educational program, but boy, did they learn.

**-Lisa Edelson, Assembly Coordinator**
