- How to start your recycling program
- Engaging employees and improving morale

Reserve your place for this FREE workshop by contacting Stephanie at 206-449-1149 or stephanie@cascadiaconsulting.com.

Presenters

Katie Atkins

Throughout the Northwest, Katie is known for her dynamic and engaging presentation style and is frequently sought after for trainings. She has over twelve years experience training businesses, property managers, students, and volunteers. Katie has trained staff, conducted waste audits, and provided technical assistance at facilities such as Children's Hospital, Regence, and the Seattle Art Institute on how to successfully and efficiently increase recycling and collect food scraps for composting. Katie has also taught workshops on topics ranging from composting yard and food waste, recycling, integrated pest management, the importance of water quality, reducing use of hazardous materials, and sustainability. For the last 10 years, Katie has been the lead trainer for King County's Master Recycler Composter program—an annual volunteer training.

Stephanie Terrell

Stephanie helps clients identify and put into place strategies that benefit the environment, the economy, and the community. Stephanie has six years of "inside experience" designing and launching waste prevention, recycling, and resource conservation programs at Bed, Bath, and Beyond, and for the King County Solid Waste Division. She is the main point of contact for businesses seeking to become more sustainable through Seattle Public Utilities' Resource Venture program. Stephanie is current with local businesses' needs: she answers questions from Seattle businesses, plans events, conducts on-site visits, uses recycling and carbon footprint tools, and develops online and print resources.

Dominique Gomez

Dominique has extensive experience calculating carbon footprints for a variety of local businesses. This experience includes collecting relevant data on materials use, transportation, waste, and energy for Pagliacci Pizza's carbon footprint and assessing energy, water use, and transportation metrics for Seattle's Hotel Monaco. Dominique also led a carbon footprinting seminar with the Kansas City Chamber of Commerce to conduct carbon footprints for 40 Kansas City-area businesses.

Representatives from Waste Management and Cedar Grove Composting will be on-site to present their programs, recycling systems, and answer questions.

Recycling Saves You Money!
