

LEED for Homes Program Review

Presented by the U.S. Green Building Council

This course is designed to provide key concepts needed for successful participation in the LEED® for Homes program including a review of the Rating System, green design and construction practices, certification and verification procedures, and the benefits and costs of LEED Homes.

LEARNING OBJECTIVES

After completing this course, you will be able to:

- Describe how LEED® for Homes can be applied to various residential building types.
- Define the Rating System credit categories
- Understand the evolution of the LEED for Homes Rating System through the pilot process
- Communicate to stakeholders specific details of LEED for Homes
- Know where to go for additional resources and support

WHO SHOULD ATTEND?

Building industry professionals seeking to increase their understanding of the LEED® for Homes Rating System and green building strategies, benefits and resources.

- Architects
- Designers
- Consultants
- Owners
- Engineers
- Developers
- Contractors
- Manufacturers

LEARNING LEVEL

This is a 200-level course. Consider our *Introduction to Homes* online course as preparation.
