## GUIDE to RECYCLING CONTAINERS

### Purpose

The purpose of this guide is to give school officials ideas for the many types of containers that can be used to establish or improve school recycling programs. The guide includes a variety of containers (small, medium, large, etc.) as well as accessories for special needs and carts for moving materials.

(Please see disclaimer at the end of this document.)

### **SMALL CONTAINERS**

**These containers are suited for classroom, desk side and office collection of recyclable materials. Use multiple containers for separating materials, or use one well-labeled container to commingle recyclable materials. (Commingle means to use one container to collect different types of recyclable materials.) Use the typical blue recycling containers or choose colors that match your school's spirit.**

## MEDIUM CONTAINERS

The Rubbermaid "Brute" series of waste/recycling cans or similar cans are very common. They are suitable for waste and recycling collection in lunchrooms, hallways, and other public areas. They are also used to consolidate recyclable materials from classrooms and offices. Slim versions of these containers are often used near copiers for paper recycling or near vending machines for can and bottle recycling.
