

Figure FD-1

# Chinook Distribution in WRIA 9

Map 1 of 3

## TECHNICAL DRAFT

This map depicts the known freshwater distribution of chinook salmon (*Oncorhynchus tshawytscha*) for Water Resource Inventory Area (WRIA) 9. The depicted limits of known freshwater distribution of chinook salmon are based upon the collective personal knowledge of participants in the WRIA 9 mapping project and data they gathered from published and unpublished databases.

This map may underestimate or overestimate the actual distribution of chinook salmon. Also, this map may inaccurately depict the location of water bodies. For example, some water bodies may be incorrectly located on this map, or may not be depicted on this map at all. *All users of this map should seek the assistance of qualified professionals such as surveyors, hydrologists, or fishery biologists as needed to ensure that such users possess complete, precise, and up to date information on freshwater chinook salmon distribution and water body location.*

The information depicted on this map is current as of May 2000. This map may be revised at any time. Although the WRIA 9 Technical Committee intends to revise this map on an annual basis, the WRIA 9 Technical Committee cannot and does not guarantee that this map will be revised on an annual basis or at any other interval.

### Chinook Distribution - Streams

- Present - First Hand Information  
Species is known to be present due to first-hand observations, or from electro-fishing, spawner surveys, field reports, and other direct sources of data.
- Present - Second Hand Information  
Species is thought to be present from second-hand observations and information.
- Should be Present  
Species should be present due to suitable habitat conditions, presence in adjacent waters, and absence of known barriers, though presence has not been observed.
- Barrier Prevents Presence  
Species should be present because of suitable habitat conditions, but is not because of artificial barrier.
- Present According to the WDFW WRIA Catalog of Streams (Williams, 1975)

### Type of Annotation

- General Note on Fish
- Habitat (fish presence presumed due to habitat)
- Barrier (man-made or natural)
- Outplant Location
- Juvenile
- Spawning
- Present According to WRIA Catalog (1975)
