

Andrew Graham

Andrew Graham is a water resources planner at HDR Engineering, Inc. He has a bachelor's degree in geology from Carleton College and a master's degree in public policy from Harvard University. Mr. Graham has led or contributed to water system plans, water conservation plans, and reclaimed water assessments for numerous public water systems in Washington and the Pacific Northwest. He has served as a facilitator for multi-stakeholder committees addressing water resource issues. He has also been active in Washington State's Watershed Planning program, authoring several watershed plans, as well as statewide guidance documents and reports on the program such as the 2002 Report to the Legislature of the Watershed Plan Implementation Committee.
