Figure A-11

**Typical Wetpond**

- **First Wetpool Cell**: 25% to 35% of wetpool volume, excluding access ramp
- **Berms or baffles** at water surface or submerged 1' below water surface
- **Second Wetpool Cell**: Emergency overflow water surface
- **Manholes and outlet pipes**
- **Outlet erosion control energy dissipation**
- **Inlet pipe and catch basin per detention facility requirements**
- **Emergency spillway per detention facility requirements**
- **Plantings required on cut slopes for lake protection facilities**
- **Access road to outlet structure**
- **Access road to outlet structure**
