

Schematic Representation of the Results of the Green River Temperature Study (August, 2001 - February, 2002)

Notes:

- Each black bar represents the range into which the middle 70% of the temperature records fell for each site
- Left bar = August through October, 2001. Right bar = November, 2001 through February, 2002
- The white circle represents the geometric mean of the records for that site each period
- Locators: ● Temperature recorders
● Stream gages
● Water quality
