

Deconstruction & Salvage Assessment

Project/Permit Number _____ Whole Building Removal (demolition) Alterations
 Nonresidential Project Residential Project

Project Address _____

Owner/Agent Name _____ Phone _____

Certified salvage verifier (If required) _____
Contact Name Company Phone

A **deconstruction & salvage assessment** is required when you submit your application for all projects that include demolition, such as whole building removal and alterations, where the area of work is either greater than 750 square feet OR the construction value is greater than \$75,000. Use the deconstruction & salvage assessment matrix below to identify all building materials impacted by demolition that could be salvaged and reused ON or OFF-SITE instead of being sent to a landfill or recycled.

By checking this box, you have determined your project does not meet either the 750 s.f. or \$75,000 threshold and do not need to complete this form.

Who fills out this form:

The Owner or Owner's Agent when...	The project scope involves additions or alterations
	Material removed from a project is going to be reused on-site or at a specific alternate project site <input type="checkbox"/> Project #/Address _____
A certified salvage verifier when...	The project includes whole building removal (Deconstruction/Demolition)

- A certified salvage verifier is a person listed on the [King County approved salvage verifier list](#). A certified salvage verifier may use this or an alternate form
- ONLY a certified salvage verifier may check off this box if there is nothing of value to salvage

 (Signature of certified salvage verifier)

Commented [PK1]: Note to jurisdictions: King County will administer the salvage verifier training, certification, maintain the list of qualified individuals, and provide a hyperlink here.

Deconstruction & Salvage Assessment Matrix

Building Component	Specific Material	Quantity	Notes
Cabinets	Solid Wood (with back panel)		
	Other (with back panel)
