OUR LANDSCAPE
- 3 federally-protected salmonid species
- 6 major river system basins
- 100 miles of marine shoreline
- 500 miles of agricultural waterways
- 760 lakes and reservoirs
- 1,796 individual farms
- 3,000 miles of rivers and streams
- 25,087 acres of farms producing food
- 48,204 acres of total farmland
- 52,000 acres of 100-year floodplain
- 877,000 acres of forestland

OUR WORK as of October 2019
- 1 research vessel to monitor water quality in Puget Sound.
- 6 buoys to monitor water quality of large lakes.
- 52 years’-worth of data maintained by the Environmental Lab.
- 500 flood facilities and revetments maintained and improved, totaling 119 miles.
- 1,229 acres of floodplain and riparian habitat restored, to date, to support salmon recovery in WRIAs 7, 8 and 9.
- 2,000+ Low Impact Development sites on private property regulated.
- 2,353 stormwater facilities maintained and improved.
- 2,500 stream crossings being surveyed for fish passage barriers.
- 13,000+ infestations of Class A and B noxious weeds controlled annually.
- 13,163 acres enrolled in the Public Benefit Rating System.
- 15,000 samples process and analyzed annually at the Lab.
- 15,400 acres of farmland preserved through the Farmland Preservation Program.
- 156,898 acres of land (e.g., open space, trails, farmland, parks, forest, and floodplain) permanently protected, since 2001, through fee and easement acquisitions.*
- 500,000 parameters are used to analyze lab samples.
