MIDDLE FORK SNOQUALMIE RIVER
CAPITAL INVESTMENT STRATEGY
COMMUNITY MEETING

Tuesday, February 25, 2020
6:30 – 8:30 pm (Presentation at 7:00 pm)
Mt. Si Senior Center 411 Main Ave S, North Bend

Purpose: Share updated information about flood hazards and get community feedback on proposed solutions included in the draft Middle Fork Snoqualmie River Corridor Capital Investment Strategy.

6:30 - 7:00 Open House

7:00 - 7:10 Welcome and Introduction: Supervisor Kathy Lambert, King County Flood Control District

7:10 - 7:25 Middle Fork River Corridor Planning Process Update: Chase Barton, Snoqualmie Basin Supervising Engineer, King County River and Floodplain Management Section
• Plan Goals
• Overview of a Corridor Planning Process
• Summary of Flood Hazards and Risks
• Previous Feedback

7:25 - 7:35 Community questions and comments:
• Questions regarding goals, planning process, hazards and risks, or previous feedback?

7:35 - 7:55 Middle Fork Draft Capital Investment Strategy: Chase Barton
• Proposed solutions and sequencing to reduce flood and channel migration risks.
• Next steps

7:55 - 8:15 Community questions and comments:
• Are these the best approaches for the identified problems?
• Are the approaches sequenced properly? If not, what would you change?
• Do you have other questions or concerns about the draft Capital Investment Strategy?

8:15 - 8:30 Open House
**Project Area**

The Middle Fork Snoqualmie River planning efforts that result in the Capital Investment Strategy (CIS) are focused on the lower four miles of the Middle Fork Snoqualmie River, upstream from the confluence with the North Fork Snoqualmie River to the Tanner Revetment.

**Project Information**

The draft Middle Fork Snoqualmie River Capital Investment Strategy is the result of planning efforts throughout the river corridor. The draft Middle Fork Capital Investment Strategy recommends a prioritized and sequenced suite of projects that will achieve the goals and objectives of the planning efforts set forth by the King County Flood Control District in Motion No. FCDECM 2018-03.1, outlined below.

A characterization of flooding and channel migration conditions along the river corridor has been completed. This characterization is based on data collection, computer modeling, technical analysis, and consultation with tribes, local residents and other interested stakeholders. Together, this information describes existing and potential future conditions and provides a basis for the prioritized and sequenced draft Middle Fork Capital Investment Strategy.

**Project Goals**

1. Reduce risks from flood and channel migration hazards.
2. Reduce long-term repetitive costs of flood hazard management.
3. Integrate sound and sustainable flood hazard management projects/practices that benefit the natural environment to the degree practicable; and
4. Incorporate stakeholder and community input into the corridor planning process in an equitable and socially just manner.

**Project timeline**
