

PUBLIC NOTICE OF INTENT TO AMEND

The Growth Management Act (GMA) requires early and continuous public participation in the development and amendment of comprehensive land use plans and development regulations to implement the plan (RCW 36.70A.140). King County Code 20.18.150 provides the basis for the county's public participation program and requires that the public receive a notice of intent to amend the comprehensive plan and development regulations at the same time that the state is given notice. GMA requires state notice at least sixty days before adoption of an amendment (RCW 36.70A.106). The purpose of this notice is to provide public notice for a change to a development regulation.

In January 2019, the King County Department of Permitting and Environmental Review intends to forward the following amendments to development regulations to the Metropolitan King County Council for consideration and adoption:

A proposed ordinance to amend the shoreline development regulations in King County Code Titles 20 and 21A to be consistent with changes in state law and to change regulations for aquaculture and net pens. These changes are being made as a result of the required 2019 periodic review of King County's Shoreline Master Program (SMP), in accordance with the state Shoreline Management Act.

The Department is currently accepting public comments on this proposal through Friday, November 30, 2018. Comments can be via the following methods:
