

Additional Data Sources for Opportunity Area Projects

The Conservation Futures [Match Waiver](#) webpage provides information about how to qualify as an Opportunity Area, and the Opportunity Areas [map viewer](#) provides a data report on your proposed project area. If you are looking for additional information beyond the data report and your knowledge of the population to be served by the project, here are some sources you may choose to consult. You are welcome to draw from these or other relevant information as you complete your application.

Topic of Interest	Resource link	Description
