

Joint Development of Affordable Housing + Parks

Credit: kaileysmith9

The King County Land Conservation Initiative works to ensure equitable access to open space for all. To advance this goal, the **Conservation Futures grant program** can help protect parks, gardens, and other green space near or within affordable housing. Pairing open space with affordable housing helps prevent displacement and brings important health benefits to the community.

- Conservation Futures can cover 100% of eligible acquisition costs in qualifying areas through our [match waiver program](#).
- For more information see [our website](#) or contact [Ingrid Lundin](#).
