CITY OF SNOQUALMIE ALLOCATION**

TOTAL		<b>\$525,000</b>

**Project Description:**

1047226 - Snoqualmie – Snoqualmie Riverfront Reach

This is a multi-year project to remove frequently flooded homes and complete a passive waterfront park and Riverwalk Trail along the Snoqualmie River. The project area links Snoqualmie’s historic downtown on Railroad Avenue SE to the Snoqualmie Valley Regional Trail. The City seeks to acquire properties located in the FEMA-designated 100-year floodway which have experienced repetitive flood damage. Acquisition and restoration of the riverfront will improve habitat quality in this important wildlife habitat corridor. Restoration will contribute to Snoqualmie River water quality improvement by planting native vegetation and facilitating increased shading on the southern banks of the Snoqualmie (the river is 303(d) listed for temperature).

2019 fiscal year: The City has prioritized four parcels containing approximately one acre of land in its current request. The CFT Committee recommendation will fully match the \$450,000 secured in Flood Control Zone District funds for three parcels, and will provide additional CFT funding that could be matched by Floodplains by Design or other match funding still being sought. In the broader 2.2-mile reach of the river, the City has acquired more than 66 acres across 42 riverfront parcels. Within this specific project area, there are just 16 of out of a total of 28 residential properties remaining to be acquired.
