

Conservation Futures + Stormwater Parks

Manchester Stormwater Park
Credit: PSRC

Stormwater parks can provide recreational amenities while managing stormwater in our communities. **King County Conservation Futures acquisition grants may help fund land purchases for stormwater parks. Past Conservation Futures-funded sites may offer opportunity for stormwater park creation.**

Green stormwater infrastructure can co-exist with trails, benches, community gardens, and other recreational amenities. We can create great places for community use while providing essential stormwater retention and water treatment for our environment.
