

A-5 Storage of Dry Pesticides and Fertilizers

Best Management Practices (BMPs) are required by King County Code 9.12. If the BMPs included here are not enough to prevent contamination of stormwater, you will be required to take additional measures.

Required BMPs:

- Store all material so that it cannot come into contact with water.
- Containers and bags must be covered, intact, and off the ground.

Required Routine Maintenance:

- Immediately clean up any spilled fertilizer or pesticides and ensure that the materials are kept in the designated covered or contained areas.
- Store and maintain spill cleanup materials near the storage area.
- Sweep paved storage areas as needed. Collect and dispose of spilled materials. Do not hose down the area.

More Detailed Information Can be Found at:

- Covering Information Sheet
