

A-44 Dust Control for Commercial Operations

This activity applies to existing manufacturing and commercial operations as opposed to new construction or land development. Material handling activities may include concrete crushing, cement mixing, commercial composting, stone grinding, and wood milling.

Best Management Practices (BMPs) are required by King County Code 9.12. If the BMPs included here are not enough to prevent contamination of stormwater, you will be required to take additional measures.

Required BMPs:

- Sweep paved areas where dust and erodible materials accumulate. Use vacuum sweepers to minimize generation of airborne dust and for more efficient dust removal.
- Clean equipment and vehicles that leave the property to prevent dust and track out of material. Create a designated wash area to collect and properly dispose of the wash water. Never wash down equipment or vehicles to the storm drainage system.
- Train employees in the proper operating procedures to minimize dust accumulation.

Supplemental BMPs—if the Above are Not Sufficient:

- Use dust filtration and collection systems such as bag house filters.
- Use water spray to flush dust accumulations to an approved treatment system or the sanitary sewer where available and allowed by the local sewer authority and the King County Industrial Waste Program.
- Use approved dust suppressants such as those listed in the King County Surface Water Design Manual, Appendix D, Erosion and Sediment Control Standards.
- When pH levels in stormwater rise above 8.5, the pH must be adjusted to the acceptable range of 6.5 to 8.5. Refer to the King County Surface Water Design Manual Appendix D Sections D.2.2.7 and D.2.2.8 for information on pH adjustment.

Additional Information:

- Department of Ecology Publication “Techniques for Dust Prevention and Suppression,” #96–433. Please note that not all dust suppressants are appropriate for use near storm drainage systems or surface waters.
- Contact Puget Sound Clean Air Agency and/or the Washington State Department of Ecology for air pollution control regulations.

For more information or assistance contact the King County Stormwater Services at 206–477–4811 and visit kingcounty.gov/stormwater.
