

New Howell Street traffic lanes and parking

Convert this segment of Howell to four eastbound lanes, with one lane reserved for transit during the evening commute period, from 3 to 7 p.m. There will be no westbound lane on that part of Howell.

Create a total of about 40 new parking spaces, including spaces on Howell along the left curb between Terry and Yale avenues for use at all times except the evening commute hours, and back-in angle parking on Eastlake Avenue East available 24/7.

Convert Eastlake Avenue East between Yale Avenue and Stewart Street to a one-way northbound corridor.

Westbound traffic from Eastlake Avenue East and from the I-5 Stewart Street exit will need to travel southwest on Stewart Street.

Allow general-purpose traffic to use the bus lane on Howell except during the evening commute hours, 3-7 p.m., on weekdays.
